EDUCATION

Dr. B.C. Roy Engineering College <i>Bachelor of Technology in Electrical Engineering</i>	Durgapur, WB Aug. 2024 – Aug. 2028
Raghunathpur G.D. Lang Institution <i>Higher Secondary Education</i>	Raghunathpur, WB 2024
Raghunathpur G.D. Lang Institution <i>Secondary Education</i>	Raghunathpur, WB 2022

EXPERIENCE

Google Cloud Arcade <i>Google Cloud Skills Boost</i>	Nov 2024 – Present Remote
- Achieved multiple Arcade milestones by completing tasks in Cloud Computing, AI/ML, Kubernetes, DevOps, BigQuery, and Vertex AI - Developed practical understanding of cloud infrastructure, deployment workflows, and modern AI services - Gained experience working with real-world Google Cloud tools and technologies	
Trainee – 3D Printing & Additive Manufacturing <i>C-DAC Kolkata</i>	2026 Durgapur, WB
- Learned CAD modeling, product prototyping, and FDM-based 3D printing workflows. - Worked with CATIA V5 for design and manufacturing applications. - Explored rapid prototyping techniques and modern manufacturing processes.	
Generative AI Trainee <i>Internshala Trainings</i>	2026 Remote
- Learned Python fundamentals, prompt engineering, and AI integration techniques. - Built AI-based solutions including chatbot and automation projects. - Explored image generation, LLM workflows, and practical AI applications.	

PROJECTS

Smart Energy Monitoring & Theft Detection System Using ESP32 <i>ESP32, IoT, Blynk, OLED, Relay Module</i>
- Developed an IoT-based smart energy monitoring system for real-time tracking of voltage, current, and power consumption. - Implemented theft detection mechanism that identifies abnormal energy usage and triggers instant alerts. - Integrated ESP32 with Blynk IoT platform for remote monitoring and control through mobile devices. - Displayed live system status on OLED display and activated buzzer/LED alerts during theft conditions.
Power Consumption Analyzer <i>Python, Data Analysis, Streamlit</i>
- Developed a data-driven application to analyze and visualize electrical power consumption patterns. - Implemented automated calculations for energy usage, efficiency analysis, and consumption trends. - Created interactive dashboards for monitoring power utilization and identifying optimization opportunities. - Generated graphical reports and insights to support better energy management decisions.

My Portfolio: rupak-chatterjee.vercel.app

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, Java
Web Development: HTML, CSS, React.js, Streamlit
Cloud & DevOps: Google Cloud Platform (GCP), Kubernetes, BigQuery, Vertex AI, Cloud Storage
AI & Machine Learning: Generative AI, Prompt Engineering, AI Integration, Chatbot Development
IoT & Embedded Systems: ESP32, Arduino IDE, Blynk IoT, Sensors, OLED Display, Relay Modules
CAD & Manufacturing: CATIA V5, CAD Modeling, 3D Printing, Additive Manufacturing, FDM Technology
Tools & Platforms: Git, GitHub, VS Code, Overleaf, Google Colab
